Roto Molded Keyboard Cases

Roto-molded case construction allows for unique features while maintaining a very competitive price.

SKB Roto Molded Keyboard Cases feature a molded-in unbreakable carrying handle, end handle, and an integrated valance design which incorporates a new patent-pending trigger release latching system. These indestructible latches are injection molded from fiberglass reinforced nylon, are easy to operate and survive the rigors and abuse of the road. Each case has roller blade style wheels for easy transport. With the adjustable corner cleat system keyboardists can easily position the cleats to accommodate a variety of different keyboards.

1SKB-R6020W

Roto Molded 88 Note Keyboard Case

57 3/4" x 19 1/2" x 5 1/2" max. interior space, 31.0 lbs.

ATA Keyboard Cases

ATA cases provide dependable transport and meet ATA Cat 1 specs as airline shipping containers.

These SKB Keyboard cases have been re-designed to accommodate new TSA accepted and recognized locking latches. The TSA locking latch allows the traveler to securely lock their case and still allows for necessary security inspections and re-locking of the case when traveling. The patented corner cleat design holds the keyboard in place on an indestructible hook and loop fastener surface. The foam in the top of the lid adds additional support to the keyboard while in transit. Exterior bumpers protect the valance and hardware from impact damage.
